LONG TUNNEL **CUTS INTO ORE**

Important Disclosure in the Indianapolis Group of Mines Over in Tooele.

The long tunnel through which the wealth of the Indianapolis Mining company's monster ledge in Tooele county is being tapped has, at 600 feet from its mouth, penetrated the footwall, and is nouth, penetrated the footwan, and now forging its way toward the hanging wall upon which the ores occurred in the original or upper workings, said harry Joseph, the company's consulting engineer, on his return from camp, in company with President Isador Morris. Meanwhile ores are occurring along the course of the avenue which shall be made to afford an outlet for the company's wealth, while draining the zone, not a little copper associating itself with silver and gold. In the upper workings on the ledge, which measures several hundred feet between walls lead predominated. It was contended at that time that with depth this metal would be replaced by copper, as has it been at Bingham, between which camp and the home of the Indianapolis the relations are by no means remote, and that such a change has occurred the cres on the tunnel level afford conclusive evidence. Within the next 200 feet Mr. Joseph says the main ore bodies should be encountered, and of the ultimate productiveness of the zone he has no doubt.

The development of the proposition now forging its way toward the hang-

The development of the proposition has been along lines both conomical and intelligent in Toocle county, the home of some of the biggest mines in the State for many years, should add another to its roster the present sea-ion in the Indianapolic.

SURVEY COMPLETED FOR BINGHAM TRAM

A survey for the aerial tram with which it is proposed to equip the proporties of the Bingham & New Haven Mining company in the great camp of copper was completed by the company's engineer on Sunday last, and estimates ill be in the hands of President Stod-ard, who has been over the route with in expert tram-builder in the next few hours. While official announcement has not been made that a tramway will be constructed now appears quite concluvonstructed now appears quite conclusive. At just what point on the railway connection will be made has not been divulged, aithough it is said the transway will not be less than 3000 feet in length. Meanwhile telephone connection with the mines is being established while a steady tenagra of ore less. lished, while a steady tonnage of ore is arriving at the valley furnaces. With conditions at the youngster the mangement is very much pleased, the main level continuing on ores with much un-explored territory ahead of it.

MINING CONGRESS AND ITS FUTURE HOME

The delegation to the American Mining congress at Portland, Or, hopes that, with the acquiescence of the City closing quotations for mining stocks to-Council, it will the present week be Andes 5.21 Belcher 5.18 Mexican 1.91 able to dispatch word to the northern city that Salt Lake has donated the gress, and that its active construction will begin the present year. Those urg-ing the matter before the Council have the assurance of several of its members aiready that they will do all in their power to grant them the lot in ques-tion for the proposed home of the congress, while the mining fraternity promlies its liberal support in the construc-tion of a building. The delegation is much encouraged and hopes to have the approval of the Council before the end of the present week.

NEWHOUSE OPTIONS ON NEVADA MINES

That the Newhouse options on the Greenback and Mountain City groups at Mountain City, Nev., will be exercised and payments made as they mature, now appears almost conclusive Morris M. Johnson, expert representative of Newhouse, discussing the groups yesterday, said the prospecting of them thus far has been with most satisfactory results with everything indicative of better ones as depth is at-tained. On the Mountain City group, where the ledge is from three to sever feet between wails, with lenses of very rich ore occurring along with the miliing ore, the vein has been opened up for 600 feet on its strike, and about eighty or the dip. The Newhouse syndicate also has an option on the Kunz group, which presents a favorable

Boston Market Grows

Special to The Tribune Special to The Tribune.

BOSTON, Mass., July II.—The Boston market continues to grow. Boston of the copper shares, today was considered the lest that we have had throughout all this recent movement. The demand is steadily increasing while selling orders are fast disappearing. Trading in the early morning was very heavy, commission and investment houses being the principal tuyers, while traders and insiders were inclined to take profits and let a few shares go. The undertone is firm and a good feeling exists. Hornblower & Weeks, brokers, \$3 State street, Boston, and 16 Wall street. New York, furnish the fol-Wall street. New York, furnish the fol-

MAJESTIC'S BARREL IS NOW ON TAP

The active disbursement of funds recently subscribed by the shareholders of the Majestic Mining company and the partial liquidation of claims against its plant and properties out of Milford, was begun immediately on the arrival of William B. Mucklow, agent for the shareholders, and his attorney, Jerome C. Smith, from camp yesterday morning, and within the next/ few hours, said the latter, over \$52,000 will have been distributed, the remainder of the fund to be applied to an indebtedness that is stacked up in Denver, and for which city Mr. Smith will depart today. When the gentlemen who had gone to camp to expedite the settlements returned, said Attorney Smith. all claims had been signed up except some smaller ones, aggregating about \$2000, and these are expected in every mail The representatives of the com-pany have been provided with accom-modations in the National Bank of the Republic, where the moneys are being checked out, and they hope to have matters so adjusted before the close of the week that they shall be permitted to give their attention to the mines. upon which \$49,000 or more will be ex pended, that when the smelter is blown in it shall have ores for an indefinite period. That the shareholders have succeeded in extricating its properties and that active development is to be resumed is an achievement on which lo-cal interests generally will congratulate them. In the undertaking no one has been more active than Mr. Mucklow, and to his endeavors more than any

other are the creditors indebted. sation said Attorney Smith yesterday will probably come up in court today

RUSHING CAMPAIGN DOWN AT NEWHOUSE

Active grading was inaugurated yesterday morning on the seventh mile of the San Pedro extension from Frisco to Newhouse, work on the fifth mile and the last two-tenths of a mile to follow in a few hours, said W. C. Thomas, who is superintending the campaign of construction at the new camp. The fifth mile will entail con-siderable blasting and heavy excava-tion, he added, although the construc-tion company is equipped for this, and the work there will be with characteristhe dispatch. Grading was also begun yesterday morning on the three-mile division between Newhouse and the mouth of the tunnel, over which a Shea engine will operate.

The installation of the massive crush-ing plant at the mouth of the tunnel will begin at once, while the manufac turer of structural steel has been in-structed to begin shipments July 16. Thomas departed for camp again last night.

THE WOODSIDE MINE

RAISING SOME WEALTH

The Miner, reviewing the week Park City, says: A shipment of two lots of ore amounting in all to forty tons or more, is the second for the Woodside this week. The lots consist of a carload each of first-class ore and of the product of the jigs. There is a steady output from the jigs, and five cars of ore from the mine last night at-test the fact that the output is by no

means on the wane.

The winze on the ore chute in the Comstock has reached a depth of forty feet and the ore shows an improvement feet and the ore shows an improvement in quantity and quality which promises great exposures when the water in the shaft permits deeper mining. The ore is very rich, being a mixture of silver-lead and copper pyrites.

The best ore yet taken from the Nelson in Elkhorn district has appeared during the last week in the drift in increasing quantities, and a continued creasing quantities, and a continued improvement will make a shipment imperative. The water problem is to receive attention right away. The forty feet in the shaft is to be let out of the bottom, via an old tunnel. The face of this tunnel is within 120 feet of the whaft and will reach its destination to shuft and will reach its destination ten feet below the shaft bottom, or eighty-five feet from the surface.

Another strike in the record at the New York this week. An ore chim-characteristic of the ground, but unusually rich contents, was encountered and passed through. The number and frequency of the chimneys prove that the New York bonanza is mine and that its future lies in deep mining," says an employee of the prop-

THE DAY'S OUTPUT OF ORE AND BULLION

In the ore and bullion market the day's settlements amounted to \$62,800, McCornick & Co. reporting them as they follow: American bullion, \$19,600;

cold, silver, lead and copper ores, \$43,-

In the metal market silver railied and moved up three points to 58% cents an ounce, with lead stationary at \$2.50@4.20 per 100 pounds and casting copper at 11% cente a pound.

GOES TO JEROME TO TAKE CHARGE

William McDermott Appointed to Manage United Verde Copper Mine.

IS AFTER OHIO Beginning next week, the operations at the great United Verde copper mine in Jerome, Ariz, will be carried on under the direction of a Salt Lake man Tempting Proposition Poked at the William McDermott has been appointed by Senator Clark to this important post and left last night to assume his duties.

The selection does credit to the judgment of the Montana Senator, as Mr. McDermett has on numerous occasions demonstrated his ability as a practical mine operator. For thirty years he has been more or less connected with the Clark interests, both as a mining expert and a raffroad man. Becently he has been general foreinan of the San Pedro road. When Frank Clemens, the general superintendent of the United Verde, was compelled to resign because of ill-health, the post was tendered to Mr. McDermott. He had never seen the mine, but, after visiting Jecon the mine, but after visiting Jecon the mine was the second to the mine was sent of the Montana Senator, as Mr. proposition. What the fate of this proposition will be will be determined, perhaps, before the expiration of the present week. By those who have been seen the mine, but, after visiting Je-rome and inspecting the workings, he found the position to his liking and ac-cepted the offer. He came back to Salt Lake to settle up his personal af-fairs and will return to Arlzona via Pueblo exploiting the story it is claimed that the company has an opportunity of taking down approximately \$500,000, or

As general foreman of the United the acquisition and equipment of its most valuable estate. Since the trans-fer was made to the present company

As general foreman of the United Verde he will have 200 men under his control. He will oversee the production of ore and its delivery to the smelter run in connection with the mine. His immediate superior will be C. W. Clark son of Senator Clark and general manager of the property.

Mr. McDermott his made his home in Salt Lake for the past five years, living at 664 East Plan South street. His new position will make it necessary to change his residence, and he will soon establish his family, consisting of Mrs. McDermott and three children, at Prescott, forty miles from Jerome.

he said. Sait take people are becoming interested there, and they think that good returns can be made on investments. He says that the ledges are rich in silver and lead. AT THE HONERINE

Stockton Sentinel J. P. Mitchener, the oteran Stockton mining operator has one to San Diego, Cal., in quest of seath. He has been silling for some ime. Mrs. Mitchener accompanied him. Meyada State Journal. The old Scorpior mine, located near the Union shaft at Virginia City, is being reopened after many years of ideness. This is another indication of the revival in mining on the lode and old-timers state it is but a forerunner of still further development to be done in the mines around Virginia City. taining silver and gold, the previous day, this from less than 300 tons of crude ore. To enable the company to increase the tonnage, a Chilian mill for regrinding will be added to the equipment of the plant today with a new

D. P. Robling, the expert mining man, has returned from Beaver county, where he has been in the interest of clients. Charley Brown, who is operating placers on the Grand river, left for Tintle to in-quire into his interests last night. The June clean-up at the Johnny mill, tatchine, is now in San Francisco, with eturns upon it expected Saturday next, aid Secretary Halberan.

The Grand Central's directors will meet at Provo today to post the July dividend of 10 cents a share, or \$25,000. The visiting officials of the Utah Coper company, who devoted Sunday to an ispection of the mill in Bingham canyon, starned very much pleased with its per-

formances.

At a meeting of the Hondanger Gold Mining and Milling company yesterday, the following officers and directors were elected President. Axel Disen, vice-president, John C. Wise, secretary and treasurer, Martin S. Lindsay, Charles Noeble, John M. Dietz. The company's property is located about three-quarters of a mile from the Century mine, Fark valley. A contract has been let on the incline shaft for 100 feet of work, and sinking on the ledge has resulted in good assays of the tale and quartz taken out. The men interested are very sanguine of the future.
